My problem is that I don't know how to get the URL from the server when I am calling the method. I am creating a new request with this method: public async Task Get(string url) { using (var client = new HttpClient()) { client.BaseAddress = new Uri(""); var response = await client.GetAsync(url); return await response.Content.ReadAsStringAsync(); } } This method is working fine and the result is returned without any problems but I would like to get the URL (e.g.: myurl/mypage/mymethod). Thank you in advance! A: Look up WebAPI and HTTP GET for details on how to do exactly this. Request : GET HTTP/1.1 Host a1d647c40b

What's New In?

Drawings in your Autodesk 360 Account are always updated to the latest CAD specifications when you sync. When you make changes in your 360 Project file, those changes are available to all your users. (video: 3:50 min.) Easily visualize changes to your drawing by comparing multiple views with your new changes. (video: 3:45 min.) See automatically how a view that you have created will change when a user's drawing changes. (video: 3:45 min.) Get the most out of the Autodesk 360 cloud by automatically syncing to and from your desktop and mobile apps. (video: 2:10 min.) See the differences between the different editing modes in the new Markup Assist tool. (video: 2:20 min.) Changes in the CAD Markups dialog make it easier to locate and correct problems. (video: 2:15 min.) Annotation: Support for Annotations. When you place, move or delete an annotation, the original values are retained. Annotations you create in your project are retained between projects. You can add and edit the same annotations in multiple projects at the same time. The Library feature provides the ability to organize all your annotations in a single file. (video: 1:40 min.) When you delete an annotation, it is automatically saved in a folder. If you want to keep that annotation, you can save it to a folder on your hard drive and replace it when you make the next project. (video: 1:25 min.) Access to all your annotations in a drawing file from the command line. (video: 1:40 min.) Multiple annotation instances per drawing. Keep track of multiple annotations with the help of multiple instances per drawing. (video: 1:20 min.) Quickly and easily access all your annotations. You can also add comments to annotations, including comments to changes made in a drawing. Open the selection task dialog and see all annotations in a drawing at a glance. Color Packs: More built-in tools to help you keep your drawings organized. (video: 1:40 min.) Color Packs are groups of colors, brushes or fills that you can use to create consistent design styles throughout your drawings. You can define a color palette and use a color manager to help you find the right colors for
