Rip Sony PSP video and audio from Blu-ray and DVD discs. Sony PSP Video Converter is a program with a pretty self-explanatory name - it allows you to prepare items for PSP devices (MP4). The tool supports multiple formats, including AVI, MPG, MP4, WMV, 3GP, MOV, RM and FLV. The interface of the application is based on a standard window where you can import video clips by using only the file browser because the "drag and drop" functionality is not included. Processing multiple items in batch mode is not possible. If you are satisfied with the default settings, then you can immediately start the conversion procedure. Otherwise, you can configure audio and video settings when it comes to the number of channels, frame rate, resolution and bit rate. Unfortunately, you cannot restore settings to their default values or create output profiles, as well as specify the output directory and filename (output videos are automatically stored in the folder of the source files). But you can set the tool to play a sound when the task is done 1d6a3396d6

But you can set the tool to play a sound when the task is done. The video processing tool runs on a moderate amount of CPU and system memory, in order to finish a task in reasonable time. It is very responsive and delivers videos with a good image and sound quality. No error dialogs have been displayed during our tests and Sony PSP Video Converter did not freeze or crash. On the downside, there is no help file and the fact that batch processing is not allowed is a major disadvantage. Plus, you cannot customize the number of CPU cores to be used, preview clips in a built-in media player or set Sony PSP Video Converter to open the output folder when the task is done. No recent updates have been made.]]> Thu, 07 Nov 2016 17:32:26 +0000 may have lived up to expectations, but H/T to Clive for the idea :) You know when you're watching a crime/mystery TV series, and at some point you just have to ask yourself, "How'd they do that?" In an episode of Sherlock, a young boy's skeleton is discovered in a murder scene and, in order to determine if the boy was killed by a criminal, or was he killed as a witness to a crime? At some point in the episode, Sherlock and Dr. Watson are exploring the scene where the bones are found and they come across a forensic sculptor. The sculptor provides an explanation as to how the bones were arranged and how the person died. The episode ends with the sculptor providing a description of the room and an explanation of how he knew what had occurred when he saw it. Obviously, the production team had a lot of
