Q: How to change visibility of a datagridview column? how to change the visibily of a column? When i click a button i want to make all the column data visible. I dont want to show the column header. please help. thank you i added the code. but it does not work. foreach (DataGridViewColumn col in dgv.Columns) { if(col.Name == dgv.Columns[0]) { col.Visible=true; } } A: It's best to just get rid of the header altogether: foreach (DataGridViewColumn col in dgv.Columns) { col.Visible = false; } foreach (DataGridViewRow row in dgv.Rows) { row.Visible = false; } This will get rid of the columns but not the header. You could change the headers and rename them in each loop if you want to keep that. A: Following shapti60's answer, here's the code to hide all rows and columns other than the first row and first column. foreach (DataGridViewColumn col in dgv.Columns) { col.Visible = false; }
