AutoCAD mobile apps are available for iOS, Android, Windows and macOS. The latest version of AutoCAD is available as a desktop app, mobile app and the cloud-based Web version. AutoCAD's user interface consists of two main components: the ribbon and the user interface (UI). The ribbon is a customizable layout of all the user-

accessible tools and commands. The ribbon was created to make it easier to organize tools and to move between them. The UI is the part of the program that allows you to navigate menus and panels, place objects in the scene and perform other activities. A number of tasks such as annotating, moving, editing or erasing are available in the ribbon. Another tool available in the ribbon is, the lasso tool. The lasso tool allows you to highlight objects in the drawing window, draw lines around objects, select objects with the tool and add objects to the selection. In addition to the tools provided in the ribbon, AutoCAD has a number of other tools that are available through the UI. These include tool palettes, selection tools, palettes, plotters and dimensioning tools.

Norman Donald ALFARO, Defendant-Appellee. No. 579. Court of Appeals of New Mexico. June 6, 1972. David L. Norvell, Atty. Gen., Thomas W. Keeley, Asst. Atty. Gen., Santa Fe, for plaintiff-appellant. Henry R. Ehrke, Ehrke & Foote, Albuquerque, for defendant-appellee. OPINION HERNANDEZ, Judge. Defendant was convicted of a misdemeanor. His motion for a new trial was granted and this appeal by the state followed. Defendant contends that it was prejudicial error to admit the testimony of the officer who made the arrest. He also urges

that because the information in the file was not introduced or read to the jury, it was not sufficient to convict. We have carefully considered these issues and the record and have concluded that the issues are without merit. There is a sufficient basis for the conviction. The case has been fully briefed and argued and the state has called our attention to an adequate answer which it concedes it did not brief. No reversible error appearing we affirm. It is so ordered.
