Just don't get your hopes up. EA Sports FIFA 18 may have garnered acclaim for its innovative new "player motion" system, but FIFA 22 is a much more modest update. And this version has never looked better. Where the previous game had felt more like a prettier PS3, FIFA 18 was a big departure, using an overhaul of the graphic engine to present the player models in astonishing high-definition that was previously only achievable on the consoles. The game has plenty of graphics and animation improvements that make each player model stand out, but the areas that really impress are the overall look of the game and the extremely realistic and convincing look of the pitch, stadium and players. New animations include the players diving and faking injuries, defenders lying on the ground and getting up in a flash, players hooking the ball over the bar and an array of passing animations that really do look like they were captured in high definition. These don't quite match the perfect replicas in FIFA 19, but they're still pretty darn close. The pitches are even more detailed and the matchday screens are a particularly impressive sight. The overall presentation of the game is improved, with the menus and presentation looking considerably better in FIFA 22. The biggest improvement is in the fluidity of the game and its responsiveness. So how has EA updated the gameplay, what new features are there and has FIFA improved at all? Over the last few years, the World's Club Championship has been a

During Squad Battles, players create a custom-made team that they train and play with using the cards and abilities they've unlocked in Career. In FIFA 22, Squad Battles lets you choose from a custom-made team of all the players in the game, which can include the best players from across the six FIFA game modes, as well as all-new characters that you can unlock through in-game features. FUT Mobile – Xbox One and PS4 players can now play as all their favourite players in the game on their mobile devices with the FIFA 22 update. Challenge your friends and even FIFA alums to a competitive multiplayer match using the new solo and duo tournaments. World Cup The new FIFA World Cup has been redesigned to provide a new level of authenticity through its revamped presentation and user interface.
