Unicorn Tails is a semi-open world role-playing game, played from the third-person perspective. Your unicorn can run around Unicorn Island and visit many locations. You can get off the island, though. Each world is procedurally generated, meaning the world looks different each time you play. Actions Choose your unicorn, customize its appearance, and explore the island. Travel across Unicorn Island by walking or riding the Pegasus. Use the various magic abilities available to your unicorn to solve puzzles, defeat monsters, and power up. Use special abilities to turn into a flying Pegasus. Multi-language support. Procedurally generated worlds with your own unique story. Press a button and your unicorn will run! Plenty of stuff to do on Unicorn Island. And nothing can get you off! - But maybe, just maybe there's a way off Unicorn Island. You'll just have to find out! A Note

from the Devs Unicorn Tails is the first game from developers RavenFist Studios. We are building this game because our children wanted a video game where they can run around as a unicorn. Unable to find one, we decided to create it. If our kids want to run around as a unicorn, chances are other kids want to run around as a unicorn too.

This isn't Insert-Word-Here Simulator. This is a world that is being crafted with thought and care. We are continuing to develop quests, events, and activities that will keep the game fresh. The more popular the game becomes, the more content we will create. This includes adding new game modes and ways to get off Unicorn Island to see new and distant lands. We are always interested in

feedback. What gameplay elements are your children enjoying? What would they like to see added to the game? We've already made several additions to gameplay as a result of 5-year-old feedback and will continue to shape the game to be a joy for everyone who plays! About RavenFist

Studios: RavenFist Studios is a creative development studio looking to build entertaining experiences for the gaming community. We've been on Youtube for a while now, and often do our own game reviews. We're extremely passionate about creating video games, and our studio is a

group of talented people who share that passion with us. Our studio motto is “We’re putting games into kids’ hands, and we

![])(How to play: You have been hired by the owner of the 'James Town' parcel delivery company, to deliver one of their packages. Unfortunately, the owner is a zombie and has been replaced by a criminal; a man called the 'Jungle Driver'. The owner's house is protected by an amulet, which will make you invulnerable if it is on your body. You must have it on your body at all times, otherwise you'll be riddled with bullets. Unfortunately, the owner's skull has also been replaced with a glowing red orb. This makes you vulnerable to everything. Your first task is to get to the owner's house by travelling through the jungle. Your only way of finding out where you are is to read a map. Get to the owner's house and solve the map puzzle. Don't forget to take care of the Jungle Driver. At the end of the map puzzle you will get a description of what you have done in each area. For example, you have to go up the steps to get to the door; you will see the name of the house you are trying to deliver to; you have a red skull in a first-person view you need to kill; the 4 wells that you need to collect water from; the 3 drops of red syrup; and then the next step on the map. Find and collect these items. For example, the first well is on the northern side of the map. Approach the house by walking through the trees.

First, you will see that there are several 4-legged animals that are going to try to attack you. Swipe to kill them. At the bottom of the map is the door of the owner. When you are ready to kill the Jungle Driver, look for the level 2-3 zombie with a red skull. They are inside a pile of broken crates in the back of the house. There is no time limit, so do as many "flyby" missions as you want. The last part of the map is where you need to find the 8 wells in a row. The first well is on the outer side of the

Recovery Dice Options: Character Building & Backgrounds Savage Planet is a Sci-fi future RPG for 5th Edition D&D! If you've wanted to use Recovery Dice to power your character's health up (even if you just wanted to use them for kicks), you need to play this game! Recovery Dice are dailies for recovering hit points,

and you can do them any time you want!

Features & Content: The Good: Recover Hit Points: Recovery Dice allows characters to pick up the party's daily gauntlet of treasure, booby traps, intelligent creatures, and other challenges. As a daily, when you roll a recovery die and take any of the listed effects from the table, you recover hit points equal to the number rolled.

Fire-and-Forget System: Recovery Dice is an emergency healing mechanic. You can use it to quickly recover hit points when something bad happens to a PC. You can't use it to recover hit points on demand, though. You have to do one in a day. And the character who rolled the dice and lost them must take an action to retrieve them.

Quick Healing: A Recovery Dice might just be enough to save a party from the jaws of death. The effect "While on a roll of recovery die, the character regains hit points equal to the dice rolled." could mean the difference between a full hit point or a single point recovery. But the die still costs as much to use as it gives.

Strength and Wisdom

Counters: In the core rules, Recovery Dice are meant to act as an emergency way to recover hit points. In practice, however, there's often a time when you'd like to recover hit points. To allow this, Recovery Dice Options presents a couple of options for using Recovery Dice to gain these stats. **How To Use Recovery Dice Options: Open Up:** While the core rules assume you're coming into a game with some previous experience with the rules, Recovery Dice Options provides a variety of options for a new player to get into the flow of action and magic. This expansion presents seven options that cover a variety of different cases: **Short-Term Recovery:** Sometimes you need quick health up, but a character is not, in fact, fighting a fight. In these cases, you can use a Recovery Die as a quick source of hit points to cover a one
