## **What's new in Elden Ring:**

**The champions of the scene are gathered in one room! It's not bad work by any means. But what are the final results? The working title is "Between Worlds" (WTC), and I'll introduce today a few of my favorite characters from the game.**

**At this time, I am still considering a few ideas for the story line of the game. Since everything could basically be done from chapter 3, for now the characters are supposedly already on their way to their destiny. I should be able to propose a more clear future to you guys by mid-December after looking into a few test plans. Chapter 4, "In Stone, in the Castle, a Possible Tiger" This area is supposed to be more like an epic dungeon. Although the learning effect of the early missions in The Will to Begin I referred to previously is not supposed to be lost, here you can fully learn the formation of characters and create your own. Thus, with this dungeon area, every one will be able to enjoy a more realistic gameplay experience. As always, there is no doubt that there are people who like to explore it. It's the same with online play. Chapter 5, "Before the Battle, in the Warp" You are finally at the headquarters of the greatest enemy, the final fight for the future of the world, and other cool places, too. This chapter will be a good place to "show their colors". Chapter 6, "In Stone, who enters the Castle and Inspects the Garden of Lives" This is the chapter of welcome. Here is the place you get to meet new characters and read their stories. This chapter is supposed to cover everything in one go from introduction to the second half of the chapter. Chapter 7, "Strayed, you became the Strayed." No matter what happens you have to pull yourself together. The scene for the second half is also completed. It will be the chapter of efforts to the view of the**

Download ELDEN RING game. Install! Run the setup file. When the game starts, create a username and password, enter them. Enter the game and start your first mission. Fight. Note: The more missions you complete, the better your grades will be. How to battle? To start a battle, you can use the "enemy" icon in the left top of the screen. When the battle is ready, go to the center of the screen, where you can see what you are fighting. Position your character on the enemy to strike. Strike! At this stage, all your arrows will be used up and the battle will start. Once in the battle, you can strike one enemy at a time to kill him, or attack in groups. When you attack in groups, you'll have a limited amount of arrows per group, depending on how many fights you've already fought. When you strike successfully, the enemy will drop experience points and you will receive a reward. Example: If you kill an enemy, you will receive experience points and one of the items that you won. If you attack a group of enemies and hit only one, you will receive experience points and the other item. Next mission! In the next mission, you can use the arrow keys to move and the X button to attack. Strike wisely and victory is yours! How to level up and buy items: You can take a specific amount of experience points per mission. You can also purchase items with coins, which you can buy with the in-game gold. An example: you can buy 7 experience points or 1,000 gold (this is too much for a beginner). The weapons have a variable price in gold, so you can increase your power. You can use your coins for different items. These items may include potions, magic arrows, and equipment. Spells are unique and they can be purchased for rare items. The spells come with a fixed power, and you can advance your spell by using gold. In the center of the screen you can see your casting bar. You have 10 spells. When you need to use your spell, press the button. To advance, you need to use a spell that has a higher power. Be careful, your spell will disappear after 30 minutes. If you are low on energy,
