A battle style that strongly contrasts with typical grid-based turn-based RPGs. Direct attacks against the enemy's front and rear. Attack Enemies All Around Combat is based on a skill called skill link, allowing you to use skills by clicking on a skill icon. Enemy Skills and User Skills Enemy skills move in the direction indicated by the skill icons, and attack the target that is closest to the icon. The opposite of the skill icons is the skill link. All abilities that do not have a skill link can use a maximum of three or four skill links. Skill link skills are made use of by clicking on a skill icon. For example, if you have a skill icon for 'Arrow Seiha' and 'Shield Seiha', you can use both by using a separate skill link for 'Arrow Seiha' and a separate skill link for 'Shield Seiha.' In order to increase the number of skill links, it is possible to link several skill icons together. Skill Link Level Skill Link level indicates the total number of skill links a skill has. 1 (Basic) to 5 (Advanced) The skill links a skill has are determined by the combination of the number of skill icons that are linked and their level. 3 The maximum skill link level is determined by the number of skill icons and their level. If you have skill icons for 'Arrow Seiha' and 'Shield Seiha,' the arrow skill can have one skill link at 3 and the shield skill can have two skill links at 3. Thus, if you have skill icons for 'Arrow Seiha' and 'Shield Seiha', the total skill link level will be 7. Skill Link Characteristics The skill link characteristics of the character determine the number of skill links that the character will have. Characteristics affect both the strength of the skill link and the damage when used. Characteristics Basic Characteristics Characteristics are distinguished by the colors on the upper left side of the skill icons. Each character has two basic characteristics: Kiai Skill Link Kiai is the strength of the skill link and is determined by the strength of the skill icon, the strength of the link, the number of skill links, and the skill link level. Skill link strength is set to
