In Heavy Bullets, the aim of the game is to kill your target as efficiently as possible, before that target kills you. Once all your mission objectives are completed, you can save your game, at which point your target is in a room with a lock (you can't go anywhere until the lock is opened) and all of your points are reset. A big part of the game comes from combining weapons in interesting ways and checking out your opponent's weapons as well. In addition, you're under time pressure (that is, you have a specific number of minutes to complete the mission), and you have to make every decision very carefully. The game lasts 2-3 hours, with between 75 and 115 single-player missions. Overall Rating: 8.4/10 - "Heavy Bullets" is a very polished game, and is a fascinating break from the usual FPS gaming formula. While it's not for everyone, it's worth trying if you get the chance.
