Defend your Files with Hide My Files Defend your Files with Hide My Files is a personal and powerful security software that uses a hidden file to protect your files and folders when using your Windows PC, Mac, mobile phone, tablet or any other computer. By encrypting your files, you can avoid burglars, hackers, and snoopers being able to view and read the files. As a trademark of Hide My Files, you should never delete these files when files are protected by the HIDE MY FILES security program. You can hide files that you want to keep personal or secret or keep hidden any files that you want to protect from other users. When you put a protective file on your computer, you can access the file again if you need to. All files will remain locked and your passwords for your security program never can be detected. The HIDE MY FILES security program has some security features that make it strong and safe from viruses and dangerous threats. Hide your files with a strong password to keep them safe from snoopers, burglars and viruses. Easily hide your files and folders with your encrypted passwords and keep your secrets safe at any time from any user. Unlock your files and folders with a security password to access the hidden file. Make your files and folders visible again with a security password to protect your files, folders and secrets. Hide your folders quickly and easily by typing a file name in a text box. Search for your files and folders quickly by typing a folder or file name in a text box or the search bar. Share your files and folders securely with your security passwords from any location with the share password feature. Protect your data from unauthorized access with the delete feature and all folders without the hidden file are deleted. File-Hiding is ready for secure online or offline use. Data is encrypted only if you log-in to your secure profile. The only requirement you need is that your computer should have an operating system Vista or newer. HideMyFiles is a powerful tool to keep your documents, pictures, videos and other files private and safe. You can easily hide a file and keep it safely hidden from the users on your computer, Mac, mobile phone or any other computer. Simply right-click on a file and click "Hide" and your file will be hidden. You don't need to find the hidden file's location and you don't need to delete
