Rover Mechanic Simulator: Training Day gives you the opportunity to maintain and service your own vehicle in a real-world environment. Developed by German indie studio IGGiGS, TDR's Training Day mixes in a selection of unique vehicles from IGGiGS' own roster with a choice from a selection of user-generated content. If you have sat in a culture shock in the car and do not know how to deal with customers who take offense when you are being dismissive to their grievance, things could get tricky. The experience will earn you a long shift of errands. The last part of the day is a dream of cheering go
