What's New In ReelPortal Server?

- web based GUI - supports multiple input/output devices - supports SSL/TLS to provide secure connections - supports hosting multiple video chat sessions simultaneously - supports session recording - supports power saving options - supports presence (online/away) - supports audio and video conferencing - can be used as a local peer to peer network - central configuration - all communications are encrypted - remote management allows you to configure the system remotely - should work on any operating system (unix/windows) - should work on all hardware platform (x86, x86_64) - works on linux/mac/windows - can be used to provide easy to use video conferencing, or secure business videoconferencing. Package: reel_server-1.0.12-1.i586.tar.gz Size: 398622 bytes Steps to install the reel_server 1. Extract the package (tar) file 2. Change to the folder 3. Run the configuration file: reel_server_config.py 4. Run the command: python reel_server_config.py 5. You can now use the client to connect to the server 6. Add your own UI and resources if you prefer, or continue using the default UI 7. Run the 'install' script to setup 8. Run the client Graphical Requirements: You need a monitor capable of at least 800x600 resolution. A higher resolution will give a clearer picture, and a lower resolution will work on smaller monitors. Good resolutions are 1280x1024, 1280x800, 1024x768, and 1024x600. Other requirements: You need a sound card that will mix stereo audio properly when more than two speakers are used. The most common sound cards can be found in the computer system you already own. They usually look like a speaker set. Their sound chip is usually disabled unless it is an option in the bios. If this happens to you, you can use your cpu speaker or a headset instead. Implementation: Reel Portal Server is implemented in Python/C. Any python developer can follow the steps in this document to see how the server works. For non-python developers, please download and run the reel_server_config.py file When running the configuration file you

System Requirements:

OS: Windows XP/Vista/7/8 CPU: Dual core processor (more than 1.5 GHz) RAM: 1GB HDD: 20GB available space Keyboard/Mouse: Windows default Sound Card: DirectX 9.0 compatible DirectX: 9.0 Registry: English Windows 8 Games One of the greatest Xbox One exclusive titles for a new console is Dishonored 2, the follow-up to Arkane Studios' first title. Now, if there was a good reason
