Car Crush Racing Simulator is a 1 vs 1 full-auto racing game where you have to skillfully dodge all the state of art Car Crushing Machines and reach the finish line before everyone else. This adrenaline-pumping extreme sports game will have you at the edge of your seat. Get lots of airtime by driving over cool bumps and ramps performing some astounding stunts. Keeping your vehicle safe is extremely important as you try to keep out of harm's way in a high-intensity obstacle environment. Beware that you have to be extremely careful and stop just at the right place. Right then, it's time to test your reaction time and have some real fun. Fun Racing Game Features: - Simple controls - Highly immersive game experience - Addictive game play - Boost your vehicle for more speed and weight - Amazing spectacular locations - Thrilling tracks, where road crushes, jumps, and stunts come together - Unique events, including oil spills, lava, snow, and much more - Stunning music and achievements. The main goal of the game is to go through as many levels as you can, collecting all the points as you go. There will be tons of exciting obstacles to be avoided, such as screwing with your opponent while picking up speed at any place possible. However, those obstacles can cause some damage to your car as well. Your car might get stuck in certain spots or you might bump into some obstacles that you didn't see at all. The higher your score, the better chance you have to win the game. Make some incredible jumps as you race your way through obstacles to victory! Are you a true car racing fan and like seeing Hollywood movies? The game with "Car Crash" tagline is something you could definitely get addicted to! In this car racing action-packed car crushing game, the world is upside down and the cars are crashing to the ground! Have you ever thought about how the car bumpers would act like when you drive through them? Well, this game is going to help you experience exactly that! There will be almost 1,600 different obstacles you have to pass through to win the game and collect the points for a higher score! Be careful not to crash into them or else you'll lose all of your precious energy which you can use to do an awesome stunt! The obstacles will cause damage to your car so be careful not to miss them. Chronicles of the Great Patriotic War is an excellent simulation of the second World War. We have paid special attention to recreate as much as possible detail and architecture of the period. Chronicles of the Great Patriotic War is a turn-based Tactical Battle simulation of WW2. Players will command an army, in turn-based battles, during World War II (WWII). As a player, you will be given a military formation of up to five Battalions and their regimental organization.

Each battalion, of three regiments, can advance up to ten kilometers each turn. Each Regiment may support its adjacent battalions with artillery fire, in addition to this, each Regiment is allowed to choose three Infantry Attacks and one Artillery Attack. Players can also choose to spend down their supply by committing counter-attacks. Players can also choose to divide their forces in order to give their allies the upper hand. Players can choose to deploy air, naval and logistical assets in support of their battle. Each Decision has its own effects on its Units, their morale, in addition to affecting the victory conditions. Current Features: - Great WW2 Simulation - Field Generals and Major Generals from the World War II era. - Thousands of historical Units with historical Battle reports. - Great sound support. - Realistic formation, movement, and combat actions. - Flexible deployment system. - Ability to play WW2 Multiplayer Battles. - Historical realism. Over 6,000 pixels on the screen. Your victory will be determined in battle based on a Scorecard system. You can play against computer AI, against friend or against a hotseat ally online. In turn-based battles, you will have to place and coordinate infantry, artillery, tactical aircraft, close air support, and naval units in a combat situation. All other Allies will be placed at the start of battle. In each game you will have 3 regiments of 3 battalions each. On the morning of the Fourth of July, 1942, the German forces reached the Don river in the Yunyevka area, overrunning forward covering forces of the Soviet 232 RD. By 10.00 motorized infantry with forces of up to two battalions, having smashed 498 RR defenses, rushed towards the south-western outskirts of Voronezh. 498 RR was assigned a combat mission:

French Dignitas Psychonauts J.C. Romero at Reboot Developments have launched the new Kickstarter page for over their excellently made upcoming title, though it had an impressive \$750,000 of backing within just three days, of course with just under five days to go. The new Kickstarter page can be found at the following address:

"Psychonauts 2 takes you back to the crazed mind of Razputin, where you'll be thrown in a series of mind-bending puzzles and tested on your most basic and in some cases, non-existent, psychological knowledge. Developed by the minds at Obsidian Entertainment and Double Fine Productions, Psychonauts 2 puts you in the shoes of Tim, whose telekinetic powers have been stolen by the evil Dr. Cerebral and the agent of his grand plan, Sister Senator. Tim's adventure takes him to the wacky world of Psychonauts and his quest takes him through the twisted minds of Homelands' vast array of patients, all while finding the truth behind his own past and the mystery of

What's new in Eradicator:

version of a very very true quote I learned from my friend and mentor, Andrew Ellithorpe about the blockchain... "The best way to predict the future is to create it" - John F. Kennedy Ever since I finished University and became an MBA student, I have stuck to the same 3 rules: **READ a lot of books. Get investing. Maintain balance in my life. To teach the 3rd rule to other people, I have always had 3 core mantra that I would share with everybody: Keep Your Nose To Your Plate, and if you must have a distraction, then put all your energy into a small number of things. and if you can't afford that, then cut out all the distractions**

and live in your priorities. Practice what you preach in life, and constantly practice what you preach in life. FOR THE REST OF MY LIFE, Algorithmic Trading & Investing = Multi Strategy Investing For example, in one of my earlier trading platforms, I always used to look at my indicators and base my trading using multiple time frames. Example: I have someone who makes long/medium term FOMC projections. I have others who do simple technical analysis. I have another one who is watching residential property to take advantage of people who bought property years ago in their escrow and now want to flip it. Another wants to look at cocoa to see how long it will continue to perform before buying the cocoa mines (basically spotting an opportunity and then buying assets after seeing a trend for 3-4 months). As long as you are challenging yourself and narrowing down your focus in life, you will see that becoming a better trader takes time. Little things that you have never thought of before (or perhaps never thought about at all) will start to make the most sense in your life. Also, the secret to trading ANYTHING is to be able to not only recognise trends in the market, but have the ability to back your method with a solid fundamental analysis. I have always wanted to be an academic (like me!) and spending huge amounts of time buying books and finding and publishing them is a massive distraction. Whenever I have a spare day, I will spend half of it reading a book, the other half doing the odd stock screening and seeing if anything is worth my while. I have a lower threshold for not being

You are exploring the world of the Mindlanes. Known as hyperspace, this space is home to a few million species. The races range from mammals to klingons and from kobolds to klingons, but they all share a common set of laws. The primary one is, "Anything that can be done, will be done." If you have a task, you can imagine somebody making the task happen. The whole galaxy is a giant network of people who can do anything, and every race has its own set of tools for doing so. This

universe is big enough that you can afford to pick and choose exactly what you want, or you can be like Terraform Inc. They are the largest, most well-connected and respected players in hyperspace. Terraform Inc purchases, modifies, and sells planets. They own large tracts of land as well as the tools necessary to complete the tasks. As they receive requests for planets, they modify what resources are necessary to make a good or service. If you are interested in using their services, your task is to travel to Terraform Inc's nearest branch (pretty much wherever you are, really), to meet with them and ask for a job. Features: - Construction by cartwheel - Landscan - Manage inventory through a high-level UI, and much more - Landplay with aspects like speed and angle, hand physics, and so on - Optional hovercraft - Stylized top-down map - Many different types of component per land - Import your own 3D models - Completion criteria met through the tick of a delivery - Import your own clothing - Rentable assets - Push notifications - PayPal support - Can use any event system - Steam, cool a game through a button, start a timer, and on and on. You might even see it pop-up in-game. If you're interested in more information, I've made a separate page for the FEATURES section, which covers all the places you can find more. Download it, read it, and/or tell me what you think! The latest Sims 4 Gameplay Walkthrough by Gre3at and TotalBiscuit (Daily Gameplay Walkthroughs), where the Patcher is downloading the game.
