GARY, Ind. (WISH) — A man is being sought in connection with the disappearance of a local mom after she was found dead in the garage of her Gary home on Sunday. McHenry

County Prosecutor Doug Miller announced Tuesday that 33-year-old Danielle Smith of Gary was shot and killed inside her home and that a man is being sought in connection with the murder. Smith was last seen alive on Feb. 3 in the 400 block of Fairway Drive. Marion County Central Dispatch received a call around 11:20 p.m. Sunday. "An adult female was found deceased in a garage and the person we believe killed her is a white male," a

dispatcher said. “There is a substantial amount of blood inside the garage.” Authorities later recovered a handgun with Smith’s DNA on it inside a trash can and verified blood stains inside her home. DNA swabs were also collected from inside the home, but nothing was found to point to an apparent suspect.

The Non-Existence of God *The following appeared in the New York Times on October 30, 2004: Evidence for God — the Big Bang, the Human Genome

and other fragments of contemporary science contradict the Judeo-Christian religion. But how can this evidence contradict its ideas? An Open Letter to the Pope, the Dalai Lama and Franklin Graham Dear Reverend Fukuoka, as a psychologist who has been studying the origins of religion, I have concluded that the origin of religion can be traced to the failure of parents to provide adequate emotional and intellectual guidance to their

children. I have also concluded that when parents fail to provide such guidance, this results in the development of serious disorders in their children — such as delinquency, drug abuse and even violent crime. Given this conclusion, I find it hard to believe that an all-powerful and all-good God would have allowed this sort of destructive failure to befall his children. Worse, my own study of religion suggests that his entire system of morality is

based on concepts that are no longer relevant to modern societies. Dr. Jordan Peterson, a professor of psychology at the University of Toronto, is a noted advocate of the idea that the foundations of the Judeo-Christian

Windows-only application which converts Excel files to and from TXIsSpreadSheet files Generally, it is not designed to be run as a standalone application, but

rather is a component used in the VB development environment. This application is created to take the burden of converting Excel sheets to TXIsSpreadSheet files from the developer. XLSFile component produces a very old Excel file format (2.0) so any Excel version can open it. The application shows most of its features (put data into cells with alignment, set columns width, create XLS file, open Excel). Get XLSFile and give it a try to fully assess its

capabilities! XLSFile

Description: Windows-only application which converts Excel files to and from XLSSpreadSheet files

Generally, it is not designed to be run as a standalone application, but rather is a component used in the VB development environment.

This application is created to take the burden of converting Excel sheets to XLSSpreadSheet files from the developer. QTP Only for the Developer. QTP is a

component of the Platform Builder. Generally, it is not designed to be run as a standalone application, but rather is a component used in the VB development environment. This application is created to take the burden of converting Excel sheets to QXLSSpreadSheet files from the developer. QTXP Only for the Developer. QTXP is a component of the Platform Builder. Generally, it is not designed to be run as a standalone application, but

rather is a component used in the VB development environment. This application is created to take the burden of converting Excel sheets to QTXP spreadsheets from the developer. Summary This table lists the applications I have identified in this web space. Only one of them is available for free download. QXLS is a component of the Platform Builder and can convert an Excel spreadsheet to any of its recognized formats. QTXP is a component

of the Platform Builder.
QTSMTB can create a
spreadsheet from any QTS
pro.txt file. TXIsSpreadSheet
can convert an Excel
spreadsheet to a
TXIsSpreadSheet, but it has a
few limitations. TXIsFile can
convert a TXIsSpreadSheet to
an Excel spreadsheet. QTXP
has drawbacks as far as file
format support is concerned,
but it is a very useful tool and
is often overlooked. Q

TXIsFile to open Excel files. Q: reading csv using powershell I'm trying to read and process a.csv file using Powershell and am having some difficulties:

```
use spss $text= import-csv
"D:\path\file.csv" $errorlevel
$selectedfield $color $number
foreach ($item in $text) {
$item.addProperty "color",
$color $item.addProperty
"number", $number
$item.addProperty "selected",
$selectedfield } -foreach
($item in $text) $items |select
properties | format-table *| out-
```

file "D:\path\output.csv" \$text reads the csv file and adds the properties as it reads. It errors out when trying to write the file. What am I doing wrong?

A: I had similar problems and fixed it by chaining the commands together, so that they were executed sequentially.

```
$text = import-csv "D:\path\file.csv"
$errorlevel =
$text.addProperty "color",
"blue"
$text.addProperty "number",
"20"
$color =
```

```
$text.addProperty "selected",  
"green" $text.addProperty  
"color", $color  
$text.addProperty "number",  
$selectedfield  
$text.addProperty "selected",  
$color
```
