## AutoCAD

AutoCAD is the most widely used application for 2D and 3D drafting and design in architecture, engineering, surveying, and construction industries. The application is used by architects, engineers, structural engineers, builders, students, and many others. AutoCAD is used in over 150 countries and is estimated to be in use by over 30 million users worldwide. History [ edit ] Before AutoCAD, most of the drawings of architects, engineers, and builders were done in technical pens on paper. The task of drafting and designing 2D and 3D models with technical pens was very time-consuming. A developer at Autodesk wanted to find a faster way to design drawings. In 1982, the developer, drawing the first AutoCAD prototypes at home in a brief time frame of about one week, he created the first version of AutoCAD. The first AutoCAD was a scaled-down version of the MIT CAD system. At first, many people were skeptical about AutoCAD. They could not believe that AutoCAD could be developed on a computer. Most drawings were created by hand, then edited, then put into a CAD program. The task of designing was done from scratch with the aid of technical pens and CAD programs. With AutoCAD, the task of creating and designing drawings was changed. To use AutoCAD, the user only needed to open an AutoCAD drawing from the floppy disk, which would be familiar to a technical pen user. The two main advantages of AutoCAD were: It took less time to create drawings using AutoCAD. AutoCAD made it easy to integrate 2D and 3D drawings to create a complete 3D model. The second release of AutoCAD in 1987 introduced the concept of parametric modeling, which allows users to create models that are automatically generated based on given parameters. The first user-defined (parametric) model in AutoCAD was the door. AutoCAD has evolved from a CAD application for personal use to a sophisticated software solution that is used by both small and large organizations. In 1989, a major upgrade was released for AutoCAD, which added 3D views. In 1991, AutoCAD received a major upgrade, which introduced a new 2D/3D modeling environment, menu system, new user interface, new command structure, enhanced mathematical functions, new editing and drawing tools, more capabilities to control rendering

As of that date, the state will begin assessing premiums on the military employees' household members who are not otherwise covered under the Affordable Care Act. Currently, National Guard members are exempt from both being taxed under the Federal Affordable Care Act (ACA) and from being enrolled in Medicaid. This means that while National Guard members are contributing to the welfare of the state, their families are not being subsidized. According to the Columbus Dispatch, the Toledo Blade reported, "The state argued that the 'failure of the National Guard to cover its members' full payroll costs during the state's 2011 budget impasse forced the state to borrow \$347 million from the Federal Emergency Management Agency, a national disaster agency, to pay the Guardsmen's health insurance premiums during the 2012-'13 fiscal year. But that argument was rejected in a 2-1 decision by the court's most conservative justice, Maureen O'Neill, who wrote that lawmakers should have 'discussed whether to enroll Guard members in the state's public plan when they were negotiating budget cuts.' " As the Toledo Blade noted, "The union, which represents about 7,500 guardsmen, had agreed to concessions last year as a condition of ending a prolonged state budget impasse. The concessions included the Health Care Maintenance Organization (HMO) and a ban on public-sector wage freezes." The union's concessions were struck because it realized that this issue was a life and death issue for the members who worked in the National Guard. "They would be placed into af5dca3d97
