6.30 AutoCAD for Cloud: AutoCAD is available as a cloud-based service, allowing customers to easily install the software on any of their computers with the click of a button. The cloud version of AutoCAD differs significantly from the traditional desktop version of AutoCAD because it provides a browser-based user interface (UI), similar to web pages, and it is accessed and controlled via a web browser. Customers pay a subscription fee based on the number of cloud hours (time logged in) used by the customer. There is no charge for the installation or licensing of AutoCAD on the desktop. There is no limit to the number of cloud hours available for a user. In addition to the web-based user interface, the cloud version also offers web service APIs, integration with other Autodesk products and an easy way to add new data sets. The cloud version of AutoCAD is fully supported for at least 12 months. In December 2012, Autodesk introduced an updated cloud version of AutoCAD, which includes: Better UI with a new rendering engine. The new rendering engine provides support for three new rendering views: isometric, perspective, and drawings page. The new UI also includes improvements to the process of editing and drawing. New layouts that let you fit more on a screen, even on a tablet. Multi-view rendering, which lets you see drawings from different angles at once. Improved templates for tablet use Web service APIs A new project browser for the cloud, which is used for creating projects and sharing them with other users. 6.31 AutoCAD DXF: Autodesk AutoCAD's native drawing format. DWG, DXF, and TIFF file formats. Autodesk Exchange Apps: AutoCAD Exchange Apps is the Autodesk Exchange Application store for AutoCAD, which allows Autodesk customers to integrate 3rd-party products into AutoCAD with a simple drag-and-drop operation.
