A textbook of quantum mechanics, by mathews and venkatesan quantum mechanics mathews venkatesan pdf free download quantum mechanics mathews venkatesan pdf download quantum mechanics mathews venkatesan pdf download quantum mechanics mathews venkatesan pdf download freeQ: Identity Server 4 with SAML only returns One Redirect to Idp I'm running Identity Server 4 with SAML 2.0. I have a number of user-facing websites, e.g. and that use this authentication flow. In this scenario, I'm in a situation where I have no problem using either Idp or sp and whenever a user successfully logs in, I would like him redirected to my app, e.g. Currently, the user is always redirected to I tried setting maxAge to 0, but this didn't help. I'm open to any suggestions. A: I figured it out after messing around with the redirects and I have several solutions and case scenarios in the answers below. For a single-page, single identity experience, you can use a claims aware pipeline. For example: Startup.cs (v4) services.AddIdentity(config => { // snip code here }) .AddUserManager() .AddIdentityServer(config => { config.InjectClaims(); }); Here, we use the AddIdentityServer extension to inject some claims into the incoming request. Then, we can inject the appropriate claims into the Authorize and Redirect policies and have them set the RedirectUri. e.g. Startup.cs (v4) public void Configure(IApplicationBuilder app, IHostingEnvironment env, ILoggerFactory loggerFactory, IApplicationEnvironment appEnv) { app.UseIdentityServer(); app.UseIdentityServerBearerTokenAuthentication(6d1f23a050
