A: You just need to use indexOf method to retrieve the position for each item try { String s = jsonObj.toString(); data = (String[]) JSONfunctions.getJSONfromURL(url).get(0); JSONfunctions.JSONArray toid = new JSONfunctions.JSONArray(data);
for(int i=0;i

2020.10.11 07:35 ERROR_GETTING_IMAGES-1 A: I am running into the same issue. I am using geaccelerator and it also is crashing. I was able to get around the issue by turning the filtering off. My current solution is to add to the gevunet preferences java_arguments -Xms256M -Xmx1024M

Apparently the license file will not update or do anything when it is located under my user home. It needs to be in the main app dir. After doing that I was able to restart the app and it works fine. I hope this helps. #import "MTRemoteWebView+MTFeedback.h" #import "MTRequestDelegate.h" #import "MTRemoteWebViewDelegate.h" @implementation MTRemoteWebView (MTFeedback) + (void)initialize { // MTSC if ([[NSBundle mainBundle] objectForKey:@"NSAppTransportSecurity"] == nil) { [[NSUserDefaults standardUserDefaults] setBool:YES forKey:@"MTSC_mode"]; [[NSUserDefaults standardUserDefaults] setBool:YES forKey:@"MTSC_appId"]; [[NSUserDefaults standardUserDefaults] synchronize]; } } - (void)addURLRequest:(NSURLRequest*)request { [_delegate URL:self request:request]; [_delegate loadDidFinish]; } @end FILED 6d1f23a050
