## Huawei Modem Unlocker V.5.7.7 Torrente

Hi and have a nice day!Have you tried DC Unlocker?If not, try it.DC Unlocker is a program designed to unlock data cards.I got the unlock code for the Huawei E 160 modem. I installed DC Unlocker, connected the modem to the computer and made the necessary settings by following the instructions that appeared on the screen. Then I clicked "Get Unlckcode" and received the unlock code. The screenshot below shows the page where I got the code. (I received the code only for the E160G from MegaFon) After receiving the code, I could easily hard reset the modem. To reset the settings, I entered recovery mode.This is the standard recovery mode for Huawei modems.
