You can use the trinket to amplify audio for many different applications, such as a speaker, a speakerphone, or the audio input of a computer. The trinket has a built in speaker and microphone amplifier that can amplify audio from your computer, or from an external microphone. The trinket can also gain up to 5 inputs with gain from -10 to 30 and two inputs can be left un-gained. This device is powered by an internal watchdog timer and the programmed microcontroller clock. When the watchdog expires, it will drive the PWR_LOW pin to low, stopping the amplifier. This is only a fail-safe because if the microcontroller, itself, can power on, the PWR_LOW pull-down may keep it from booting. **NOTE:** This device requires about 8 mA. If you are supplying power with a 2AA battery pack (rather than one c6a93da74d
