the sound quality of these headphones is top notch. i am less than impressed by the build quality of this external sound card. it is fairly heavy and bulky. i think that if the sound cards (audio card) is separate and not inside the case, there would be a much better, more portable design. however, if you are traveling with this, i don't know that you will get many complaints about it. it is such a nice price. i also love the setting options on the drivers, i have it set to "vanilla". with the bass and treble control on my favorite music, it really allows me to get a precise sound, while still enjoying my music. its a nice feature, and it also allows me to enjoy the absolute best audio from these headphones! the manufacturer and vendor are by far the best user experience i have had with any product purchased from a third party online retailer. i purchased the "power-conf-safe s500" from here. i was impressed that this arrived swiftly on a rather cold chicago christmas day. the product is exceptional and i am delighted with the quality of it. i had anticipated that this would be heavy, but it is very light and does not feel at all like its extra heavy. to boot, it also has a convenient charging stand. as i said earlier, this is one of the best i have ever had the pleasure of receiving from a third party online retailer. i am so glad i went with these people and not some individual out there who needs an additional source of revenue. this is the type of satisfaction only people who have nothing to lose can afford. if these people do not meet their customer service needs, their business is over. that is my take. if the company has issues with their website, i think they should have that taken care of quickly. the competition should be on a different level and able to deal with it. i think the people who have the money to buy the product can be patient and wait for the issue to be resolved. in the meantime, they are having the absolute best value for money that exists in the marketplace. 5ec8ef588b
