S14.6.4.1.3 During each period, the headlamp is mounted in the middle of the chamber and exposed for 23 hours to the salt spray. The spray is not activated during the 24th hour. The bulb is removed from the headlamp and from the test chamber during the one hour of salt spray deactivation and reinserted for the start of the next test period, at the end of the first and last three 23-hour periods of salt spray exposure, and at the end of any two of the fourth through seventh 23-hour periods of salt-spray exposure. S14.6.4.1.4 During each period, the headlamp is mounted in the middle of the chamber and exposed for 23 hours to the salt spray. The spray is not activated during the 24th hour. The bulb is removed from the headlamp and from the test chamber during the one hour of salt spray deactivation and reinserted for the start of the next test period, at the end of the first and last three 23-hour periods of salt spray exposure, and at the end of any two of the fourth through seventh 23-hour periods of salt-spray exposure. S14.6.4.1.4 During each period, the headlamp is mounted in the middle of the chamber and exposed for 23 hours to the salt spray. The spray is not activated during the 24th hour. The bulb is removed from the headlamp and from the test chamber during the one hour of salt spray deactivation and reinserted for the start of the next test period, at the end of the first and last three 23-hour periods of salt spray exposure, and at the end of any two of the fourth through seventh 23-hour periods of salt-spray exposure. S14.6.4.2.3 During each period, the headlamp is mounted in the middle of the chamber and exposed for 23 hours to the salt spray. The spray is not activated during the 24th hour. The bulb is removed from the headlamp and from the test chamber during the one hour of salt spray deactivation and reinserted for the start of the next test period, at the end of the first and last three 23-hour periods of salt spray exposure, and at the end of any two of the fourth through seventh 23-hour periods of salt-spray exposure.

### Office Tool V5.9.3.3 (Installation Activation)

Office ImageInstaller v5.9.3.3. Office ImageInstaller is a command-line utility that provides the functionality of multiple.msi installers. This helps to make installation of Office items a faster and easier process. Office ImageInstaller is included with the full version of Office 2019. If you have a previous version of Office, you can download Office ImageInstaller from the Volume Licensing Service Center (VLSC). Office ImageInstaller can be used to install a single-user (non-domain) Office 2019 installation or to install both an Office 365 and a single-user (non-domain) Office 2019 installation at the same time. Office ImageInstaller v5.9.3.3.1.1.Office 2019 installations that are created or modified with the Office ImageInstaller will have the following file name and extension: ODTOutlook.exe or ODTOutlook.bat See the article about checking Office usage level on Win7 - see this link. The article shows a list of the various user types with the corresponding Bit of Office and Office usage level. I want to check this list for specific users during the test. The connectivity issue as well as the disk issues were resolved before this test was run. I assume that the reboot was to correct an incompatibility between the old and the new version of the ODT. The new version was downloaded as a file, unpacked, and then installed. The ODT on the interface now shows a version 6.0, which makes sense as we are currently using Office 2019. As we have already been informed, this issue is resolved for the majority of users. Further details on this issue can be found in the Microsoft site linked below. There is no known fix, and the only workaround so far is to reinstall Office: 5ec8ef588b
