Studio One 4.6 features legendary iZotope mixing tools and cross-platform Audiobus functionality that make it the ideal recording and mixing tool on MacOS. Load a free SoundCloud or YouTube subscription from Amplitube and record any song for free. Combine our Split, M/S, and Insert effects with the Gain Envelope function to get your sounds loud and clear. Three versions of Studio One Professional have been released: Studio One 1.0, 2.0 and now Studio One 3.0. Each new version of Studio One Professional has been optimized for a different use case. No matter which version of Studio One Professional you choose for your workflow, you can run an unlimited number of Projects without paying extra for additional licenses. Studio One Pro 3.0 includes hundreds of new features and improvements. For example, you can now record MIDI and audio together on a single track, compare multiple versions of the same song, and send and receive audio from your iOS and Android devices. You can easily create and edit your Project file right from your computer, no longer need to transfer to the DAWs desktop. Along with the simple Project file, you can import user-created projects as well as drag-and-drop Mixes and stems. Both types of projects can contain multiple Pro Tools Project or Studio One Project files. Studio One Pro 3.0 introduces import and export plug-ins which allow to share your Projects with other users. When you are ready to do that, Studio One Pro 3.0 helps you to export your Projects and plug-ins to all popular file formats: Pro Tools RTAS, Audio Interchange File Format (AIFF), Apple Loops and Samples (ALo), Apple Loops (ALo) and SoundFonts (SFZ).
