Crystal Reports also includes an integrated query designer, which allows you to write the actual SQL queries for the report. The report design environment also lets you visually design your report, as you create it. You can build the query directly in the report, using the designer's visual query editor. Crystal Reports 2008 offers a rich set of chart and graph options, so you can choose from a variety of chart types, visual styles, and visualizations. Crystal Reports 2008 also provides a variety of data-related options, such as adding data to the report from several sources. Crystal Reports 2008 also includes more options for creating information-packed reports with graphical elements. You can choose the type of charts and graphs, the options available for each chart and graph, and the associated data elements. Like any other Crystal Reports application, Crystal Reports 2007 allows you to create reports that are ready to print and display. Crystal Reports allows you to create reports and produce reports from multiple data sources. Crystal Reports provides a web-based reporting application for a variety of report components, including: reports, labels, tabular, charts, maps, and Gantt charts. Crystal Reports supports most of the basic SQL server functions, including aggregate functions, common table expressions, and data-type conversions. Crystal Reports includes many options for customizing, modifying, and saving your reports. Crystal Reports has two versions, Crystal Reports 2008 and Crystal Reports 2010. Crystal Reports 2008 supports all the features of the previous versions. Crystal Reports 2008 also offers some new features, such as report design capabilities, user-defined parameter fields, and Crystal Reports for mobile.
