This guide will walk you through the basic workflow used in Faceware Retargeter to create poses and . xib files. This tutorial will provide two code examples, one using the UIToolbar method and the other. Faceware and UIToolbar are part of Faceware, Faceware's set of project creation and assembly tools. Faceware lets you manage your projects, create new classes and projects, and manage all the other projects you create. Faceware also creates classes and projects for your application, so you don't need to use a third party plugin,
