KeyMacro is a software tool which can be used to generate personalized key codes for Microsoft Windows operating systems. Key Macros were created to ease the job of typing a lot of keys, which can often be quite tedious. A key macro is basically a set of keys that are triggered by the operating system. For example, if you press key 1 (the right shift key) 5 times and then Press key 2 (the spacebar) the key macros 1, 2, 5, 2 and 2 will be activated. Key Macros are then used as shortcuts to perform complex tasks. For example, the user can use the key macros to change his account password or to search for a certain file. This software also allows the creation of pre-defined key macros for specific purposes, such as the creation of a key code to access a specific file. KeyMacro can be used to perform the following
