A full new SQLite version through 3.7.4 and beyond The SQLite library includes a small command-line utility SQLite3 that will allow you to manually enter and execute SQL commands against an SQLite3 database. To start the SQLite3 program, just type "sqlite3" followed by the name the file that holds the SQLite database. If the file does not exist, a new one is created automatically. The SQLite3 program will then prompt you to enter SQL. Type in SQL statements (terminated by a semicolon), press "Enter" and the SQL will be executed. Installation Instructions: -----
![Installation]See picture for detail! This Packages uses SQLite3 version which might be too old. Please go to and download a newer version. Then download "Sql3" files and run them as follows: - Copy these files into your "downloads" directory - Go to your downloads directory and run the "sqlite3.exe" - Run the sqlite3 utility program 1. The MouseTool application allows users to enter mouse movements, click mouse buttons and click menus in a mouse-friendly way. You can see a list of selected actions in the tool window and you can drag and drop them to your heart's content. The tutorial video at is for version 2 of the MouseTool, though the interface remains the same. The tutorial video at shows you how to use version 3 of the MouseTool. Contents MouseTool Tutorial Video I have a few requests for video tutorials to demonstrate the program. If you have ideas for a tutorial, let me know in the forum topic at or by email at tx@mouse-tool.com With that in mind, here is the tutorial for version 3 of the program: V3 Tutorial: Using MouseTool Version 3 This tutorial is presented in several sections. The complete tutorial requires only The first section is included in the main MouseTool application. This section teaches you how to use the mouse buttons, mouse wheel and mouse menus to make selections, click the left mouse button, and drag and drop items. To start the tutorial, make sure that the "Edit Windows" item on the "File" menu is selected. On the "Edit" menu, click "Options". The "Options" dialog should appear. In the "Options" dialog, click "Mouse". A "Mouse" window should appear on your screen. The following sections will describe the items in this window. Left mouse buttons: Left Mouse Button 1: This is the left mouse button that you use to click on things. Left Mouse Button 2: This is the left mouse button that you use to right click on things. Mouse wheel: The mouse wheel is used to zoom in and out of a document, or to scroll a document up and down. If you have a mouse with a scroll wheel, the mouse wheel is located just in front of the mouse. If you have a mouse with
