QuickSync Software for Siemens SL45, SL45i, S45 and ME45 is a mobile application that allows users to synchronize the calendar entries that have been created on their Siemens SL45, SL45i, S45 or ME45 phone with the appointments they have in Microsoft Outlook. QuickSync Software for Siemens SL45, SL45i, S45 and ME45 Installer is only designed for Windows XP or higher, and it requires both Data Exchange software (install on another computer) and QuickSync Software for Siemens SL45, SL45i, S45 or ME45 app to be installed on the device. Windows XP or higher is required. Not compatible with How to Download and Install QuickSync Software for Siemens SL45, SL45i, S45 and ME45 1. First, make sure the downloaded file is a software setup package. If it is, simply double-click on the file to install the software. 2. On the next screen, select the language of the application and the date format, then click on Next to begin the installation. 3. This step will begin the download of required files. Please be patient as this may take some time, depending on your internet connection speed. 4. When the download is complete, follow the prompts to complete the installation. 5. After the installation has finished, run the application. 6. Once the application has opened, select Add New Sync Point from the QuickSync Software for Siemens SL45, SL45i, S45 and ME45 main window and follow the prompts to enter the required details. 7. Enter the Connection String of your Siemens SL45, SL45i, S45 or ME45 phone, and select "USB" as the Connection Type. The "Connection String" refers to the unique serial number of the device. This can be found on the phone itself or within the box which shipped with the phone. 8. After the details have been entered, select "New Sync Point" and follow the prompts to select the Outlook Calendar to sync your calendar with. 9. Once the syncing process has completed, select "Sync" to begin the synchronization of the data. 10. QuickSync Software for Siemens SL45, SL45i, S45 and ME45 can be configured to display or hide system applications, contacts or phonebook, or to display or hide date and

What's New in the?

Siemens SyncML Data Exchange allows you to synchronize your Outlook data with your Siemens mobile phone or pager. You can synchronize a contact and all its properties, appointments, events, notes and memos with the phone or pager. Synchronization takes place automatically by using a portable USB modem. You can also synchronize the data manually if you have the appropriate software installed on your PC. Synchronization is possible for all mobile phones that use the SyncML Profile for Siemens. The program works on Windows 2000/XP/Vista and Windows 7. Features: You can synchronize a contact and all its properties with a mobile phone or pager. You can synchronize appointments, events, notes, and memos. You can also synchronize SMS messages. You can synchronize the contact data directly by using a Bluetooth device such as Siemens Bluetooth Hands-free. You can synchronize the data manually or automatically (using a portable USB modem). You can synchronize both mobile phones and pagers with each other. Using this software, users can fully synchronize their Outlook data with the one on their Siemens SL45, SL45i, S45 or ME45 phone. This software is included with the phone and requires only a USB modem to synchronize. The features of this software include: - Synchronize data with a mobile phone - Synchronize data with a pager - Synchronize SMS messages - Synchronize the data in Outlook The software is automatically installed into the phone when it is connected to the computer, but it can be reinstalled into the phone if the phone is disconnected from the computer. Description: Siemens SyncML Data Exchange allows you to synchronize your Outlook data with your Siemens mobile phone or pager. You can synchronize a contact and all its properties, appointments, events, notes and memos with the phone or pager. Synchronization takes place automatically by using a portable USB modem. You can also synchronize the data manually if you have the appropriate software installed on your PC. Synchronization is possible for all mobile phones that use the SyncML Profile for Siemens. The program works on Windows 2000/XP/Vista and Windows 7. Features: You can synchronize a contact and all its properties with a mobile phone or pager. You can synchronize appointments, events, notes, and memos. You can also synchronize SMS messages.
