Password KeyMacro Description:

KeyMacro is designed to help you to manage multiple security passwords, and make life a lot easier! Password management is not just for users, a lot of the corporate environments are now building password policies on top of passwords and when your password is changed it is a major pain for them to

manage these passwords on their end. KeyMacro will help you to manage all your passwords and store them in a secure vault on your PC, giving you full access to all your passwords without the need of having to change passwords every time you need them. The program stores all your passwords in a very user-friendly manner and stores them all encrypted and synchronized, making the management of all your passwords a breeze. For those that use multiple devices you can easily add your accounts from all devices to the vault and sync them so that you can log on with any of them without needing to remember all your passwords, and you can add new ones at any time. There are a lot of features
