What's New in the?

Weaver EZ is a WYSIWYG HTML editor for Microsoft Windows. It includes the ability to create a wide variety of HTML pages including WEB pages, FLASH web sites, DOCUMENT files and SHOUTcast receivers.You can view the HTML source code of any of your pages to ensure that your HTML is correct. You can also preview the source code before you save your page. The ZAP Tuner is a high performance Log Scanner and Network Analyzer. ZAPTuner is capable of scanning networks and network devices in order to identify protocols and applications in use as well as capturing full network traffic, and logging it to an encrypted text file. ZAPTuner is extremely fast (2 to 3x times faster than the ZAP PE) and allows you to setup Network Protocol Identifiers (PID) for all network devices as well as map applications and protocols to them to be able to analyze and collect data from any of these network devices. With the ZAPTuner you can analyze both the clear and encrypted traffic between any network devices (LAN, WAN, VPN, Wireless) as well as sniff the traffic to and from your network to identify applications, applications and protocols used on your network. You can use ZAPTuner to scan every network device in your network and capture the traffic as well as analyze the captured data. The ZAP Tuner is a high performance Log Scanner and Network Analyzer. ZAPTuner is capable of scanning networks and network devices in order to identify protocols and applications in use as well as capturing full network traffic, and logging it to an encrypted text file. ZAPTuner is extremely fast (2 to 3x times faster than the ZAP PE) and allows you to setup Network Protocol Identifiers (PID) for all network devices as well as map applications and protocols to them to be able to analyze and collect data from any of these network devices.
