How To Switch Off Jealousy When Sims Are Involved In Bed. Sims 4 Jealousy Cheats. Published on April 29th, 2015 by lulu.k. The Sims 4 is a complete game with no add-on content, so cheats are almost useless. I want to make my sims more desirable so I know there is a specific "cheat" or anything that would help me. If there's any cheat or mod that can help, that's great. It'd also be helpful to know what the cheat is so that I can research it and see if I can make it. A: If you only want to avoid Sims getting jealous of sex between each other, I would suggest to disable the Sex Flower Power playstyle that is available by default. Doing that, Sims only have sex and get turned on in common ways. So if your Sims have a romantic relationship and are seeing each other during the day and are locked in a room together, they might want to have sex because they get hot. But if you do not have the Sex Flower Power playstyle activated, they only do it when they got turned on by seeing each other naked or accidentally. So if there is no happy relationship going on, there is nothing to get jealous about. You can also activate the "Sex Before Sleeping" playstyle. Doing so, Sims actually have sex during the day, too. I suggest to keep the Sex Flower Power playstyle activated, though, because otherwise your Sims might "have an affair" with each other because they are being controlled by the NPC while sleeping (and being bored in the process). A: I found the game cheat on You can also find it there. But if you want to skip the game.tuts, you can simply go to the game cheat and type the code "JealousyDisable" and it will disable all of it. // // BaseCacheManager.m // BaseCacheManager // // Created by YouXianMing on 2017/11/3. // Copyright © 2017 YouXianMing.
